

Barcode Label Printing System

Labels (barcode · QR Code) can be printed with a free layout. Variety of data can be converted into barcode · QR code to print labels.

<Product data>
Date of manufacture
Product No.
Production lot No.
Serial No.
Manufacturing site
Production Manager,
etc.

Zebra barcode label printer

※Barcode labels can be issued with a layout according to your needs.

<System structure example>

In conjunction with the various systems and equipment, we will continue to promote the FA (Factory Automation).

<Example 1>

Our system is operating at an automotive plant.

<<Procedure>>

1. A plate on the product is read by the barcode reader.
2. The product is turned into an inspection device.
3. If the test result is OK, the inspection device sends an OK signal to PC through the sequencer.
4. PC issues instructions to the barcode printer to print out label.
5. Barcode label, which is printed out, is affixed to the product.
6. Delivery of product

<Example 2>

Our system is operating at a plant.

<<Procedure>>

1. A plate on the product is read by the barcode reader at the time of commencement of manufacturing.
2. Details appear on the display that manufacturing is in progress.
3. The plates on the products are read by the barcode reader when shipment is approved after the manufacturing and packaging are completed.
4. PC issues instructions to the barcode printer to print out labels upon reading of the barcode in the process of shipping.
5. Barcode labels that are printed out are affixed to the product boxes.
6. Panel display indicates that the products have been shipped.
7. Delivery of products.

Contributing to the system of the future...
